

The Children's Program Kit provides over 100 skill-based and developmentally appropriate lesson plans, along with everything needed to offer a strong and effective educational support program to school-aged kids and teens of parents struggling with a substance use disorder (SUD).

Through the implementation of the lessons in the Kit, children learn they are not alone, they didn't cause it, they can't cure it, but they can learn to cope with it. Create programs so that children can learn skills such as problem solving, finding safety, and seeking supportive services. Children can build on their strengths and develop resilience to overcome their difficulties. Youth are able to learn about SUDs in age-appropriate ways and that there are safe people who can help them grow and thrive. **The Children's Program Kit is a powerful tool to help children who are impacted by parental addiction.**

Curriculum	Qty	Price	Total Cost
